PROFESSIONAL SUMMARY

Senior Backend Engineer with 3+ years of experience designing, owning, and scaling production- grade backend systems across FinTech, e- commerce, and ride- hailing platforms. Demonstrated expertise in backend architecture, microservices design, API performance optimization, and system scalability. Proven track record of owning backend services end- to- end, driving performance improvements, implementing secure authentication systems, and collaborating with cross- functional teams in distributed, fast- paced environments.

PROFESSIONAL EXPERIENCE

Senior Backend Engineer — SternPay Inc (Remote)

February 2025 – Present - Owned the design, development, and optimization of backend services for a FinTech platform supporting secure financial transactions. - Improved backend processing efficiency by 80% through code refactoring and performance optimization. - Implemented JWT- based authentication and secure authorization flows to protect sensitive user data. - Integrated internal notification systems to enhance user communication and system feedback. - Collaborated with cross- functional product and frontend teams to deliver production- ready features.

Backend Engineer — Kenrow Online (Remote)

April 2024 – December 2024 - Designed and implemented microservices- based merchant store services with a focus on scalability, fault tolerance, and clean service boundaries. - Built and deployed Stripe payment services as standalone microservices, ensuring secure and reliable payment processing. - Developed reusable image upload and media management APIs for merchant platforms. - Implemented and maintained an API Gateway to enable efficient service- to- service communication. - Ensured scalability, security, and maintainability across all backend services.

Backend Instructor — Light Tech Academy

March 2025 – May 2025 - Trained students to build secure and scalable RESTful APIs using modern backend best practices. - Delivered hands- on training on authentication, database

design, API security, and backend architecture. - Mentored students through real- world projects, improving their practical understanding of backend development.

Backend Engineer — Rit Rides (Remote)

December 2022 – March 2023 - Developed backend logic for managing rider credentials via external microservice APIs. - Implemented secure authentication and wallet funding features for users. - Built APIs for admin account management and trip booking services. - Worked closely with frontend and product teams to deliver core ride- hailing platform functionality.

Backend Developer — CoinsKash (Remote)

January 2022 – June 2022 - Integrated Google OAuth2 authentication using Passport.js. - Developed and tested wallet funding APIs using external payment microservices. - Wrote comprehensive unit and integration tests with Jest to ensure API reliability and stability.

Tech Instructor — NIIT Abeokuta

May 2023 – December 2024 - Trained 25+ students in Backend Development using PHP, Laravel, and relational databases. - Assessed over 50 learners across multiple technical programs. - Co- led full- stack software training for 20+ students under the Ogun Skill Fund initiative.

CORE TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Node.js, Express.js, NestJS

Backend & Architecture: RESTful APIs, Microservices, Monolithic Architecture, API Gateway, Authentication & Authorization (JWT, OAuth2), Role- Based Access Control (RBAC)

Databases & ORMs: PostgreSQL, MongoDB, MySQL, Prisma ORM, Sequelize

Payments & Integrations: Stripe API, Paystack, Wallet Systems, Third- Party API Integrations

Testing & Quality: Jest, Unit Testing, Integration Testing, End- to- End Testing

Cloud & DevOps: AWS, Render, Heroku, CI/CD Basics

Tools & Workflow: Git, GitHub, GitLab, Postman, Agile/Scrum, Jira, Trello

EDUCATION

Higher National Diploma (HND) – Accounting

Federal Polytechnic, Ilaro, Ogun State
